BASIC FEATURES AND OPERATION

YOUR SOUTHERN ILLINOIS STORM SHELTER IS EQUIPPED WITH SEVERAL STANDARD FEATURES.

LISTED BELOW ARE THE FEATURES AND THEIR USES.

1. SELF RISING ACTUATED DOOR- Firmly grab handle on front of door and lift straight up. When inside unit, pull door closed and pull lever towards you, the three point lock is in place and door is now secure.
2. ALUMINUM HANDRAIL- Used to help you safely enter and exit shelter.
3. FIBERGLASS STEPS- This method was chosen over the common ladder approach for easier entry.
4. CARPET- Enhances comfort and appearance of shelter.
5. NON-SKID- This non-slip surface is applied to the steps to provide you with a safe walking surface when entering and exiting the shelter.
6. AIR VENTS - Located in the upper part of the entryway, these vents allow for proper air ventilation and positive airflow.
7. SEATING FOR EIGHT- Molded in fiberglass seats will comfortably seat up to eight adults.
8. Stainless Steel Hardware- Used so that shelter will maintain its structural integrity as well as appearance.
9. **SEVERE WEATHER CAN OCCUR ANYWHERE AT ANYTIME, THEREFORE SOUTHERN ILLINOIS STORM SHELTERS RECOMMENDS THE EVERY FAMILY WHO OWNS A SHELTER SHOULD ROUTINELY PRACTICE A HOME ESCAPE AND SHELTER ENTRY PLAN, SO THAT YOU AND YOUR FAMILY WILL HAVE ABILITY TO SAFELY EXIT YOUR HOME AND SEEK PROTECTION IN YOUR SHELTER.**

THANK YOU FOR CHOOSING A SOUTHERN ILLINOIS STORM SHELTER. YOUR SHELTER IS CONSTRUCTED OF FIBERGLASS, STAINLESS STEEL, AND COMPOSITE MATERIALS PROUDLY

MADE IN THE U.S.A. TO PROVIDE YOU WITH A LIFETIME OF PROTECTION AND DURABILITY.

CARE AND USE

Now that your Southern Illinois Storm Shelter has been installed, we like to share a few tips for proper care.

YOUR SHELTER MAY SWEAT: Sweating may occur until the inside temperature balances with the temperature of the ground. The conditions for sweating are favorable. The interior finish is easy to clean with a damp cloth. Cleaning the inside of the shelter with a damp cloth followed by a dry cloth will reduce condensation. If your carpet becomes damp simply remove from shelter and place outside to dry. (This is an all weather carpet and moisture will not affect it.)

RUBBER DOOR SEAL: We recommend using a silicon spray lubricant on the seal about twice a year. This can be purchased at any auto parts store. This will prevent the seal from dry rotting and cracking.

MOWING AND WEEDEATING: Use caution when mowing and trimming around your shelter. Both can cause serious damage if you should come in contact with the shelter.

*******WARNING*******

You should never burn any type of fuel or oil lamp inside your shelter. For your best interest, you should never burn anything inside your shelter that might give off toxic fumes. You should also never have any type of solvents such as paint thinner, acetone, toluene etc. inside of the shelter. Never drive a vehicle or heavy equipment closer than 48 inches to the shelter after it has been installed. This will prevent any unnecessary damage.
